

# City-Data by Neighborhood

Compiled by Arlene Kimura

Below is a link to each neighborhood from a source called City-Data. There is a lengthy scroll before you get to Portland, Oregon, so I thought the link to each neighborhood might be more useful. The data is mostly from 2013 and some from 2010, but the trends are still current. I have pasted a link for each neighborhood but if you go "back" one page, you will see all the neighborhoods in Portland.

Do not use the drop down menu across the top if you want Portland information; that drop down seems to be for Pennsylvania cities and neighborhoods.
