

East Portland Action Plan

Welcome:

There is a long-time activist saying: “Don’t Agonize – Organize”. Many of our most vulnerable community members are understandably frightened about what the changes at the federal level will mean in our lives. EPAP respects that there may be a need to take time to have our feelings and make individual plans.

When you are ready, know that you are welcome to come together with EPAP as a pro-active group of people who established guiding principles and practices that are committed to providing an environment that ensures opportunities for equitable participation and involvement of systemically under-represented community members.

Join with EPAP to act locally to support all our community members and invite EPAP to join with your like efforts.
